22 March 2021

Dear Parents,

MDHHS Guidance for Athletics has required students age 13-19 to be tested weekly and prior to competition. These students are recommended to receive a COVID19 PCR or Antigen test prior to athletic competition once and even three times per week depending on competition type.

1. All individuals ages 13 – 19 participating in contact & non-contact athletic activities must test for SARS-CoV-2 on a weekly basis.
2. Individuals who participate in contact sports where face masks cannot be worn must test for SARS-CoV-2 before an unmasked activity, up to 3 times weekly.
3. If you choose not to participate in COVID-19 testing your student athlete cannot participate in high school athletics during the pandemic.

MDHHS GUIDELINES

**MDHHS STATE
"NO-COST" TESTING
LABORATORIES**

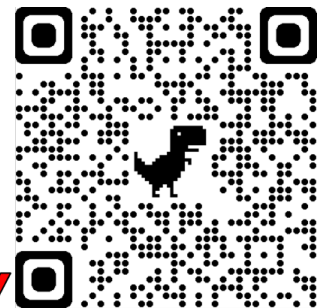

Michigan Health Clinics has performed the most tests in the Great Lakes Bay area since the beginning of the pandemic. We are a **"no-cost test center"** & listed on the Michigan state website. While we do collect insurance information, this is only to be reimbursed for our testing fees from the insurance companies and government.

1. Your testing is FREE.
2. MHC is a "no cost" testing facility.
3. You will not receive a bill.
4. You will not have a copay.
5. The fees will not be applied to your deductible.
6. This form needs to be filled out only once.

COVID-19 testing is just one of many ways your school is working to help keep student athletes, coaches, and families safe from the coronavirus.

Sincerely,

Raquel Dottery, Director of COVID19 Outreach
